### Notice of Interim Management for Protection of Wild and Scenic River Values

**AGENCY:** Bureau of Land Management, Interior.

ACTION: The Bureau of Land Management, Canon City District, San Luis Resource Area has determined that 41 miles of the Rio Grande River in Colorado was eligible for consideration as a potential addition to the National Wild and Scenic River System. This determination was made as a part of the San Luis Resource Management Plan process in accordance with the Federal Land Policy and Management Act of 1976 (FLPMA), 43 CFR 1600, the Guidance for the Identification and Evaluation of Potential Additions to the National Wild and Scenic Rivers System, the USDI-USDA Final Revised Guidelines for Eligibility, Classification

and Management of River Areas, and BLM Manual Section 1623.41A2d.

SUMMARY: In December, 1991 the Resource Management Plan (RMP) was finalized for the San Luis Resource Area of Colorado. Assessment of potential additions to the National Wild and Scenic River System was included in this planning effort. A total of 32 streams or segments of streams were analyzed and a 41 mile segment of the Rio Grande River in Colorado met the eligibility criteria. This segment of the river is "free-flowing" and has ''outstandingly remarkable values,'' therefore, this stretch needs adequate interim protection until a final decision is reached.

The 41-mile segment of the Rio Grande River, which is the last 41 miles of this river within Colorado, has been tentatively classified as follows: the upper 33 miles meets the "Scenic" classification criteria, and the lower 8 miles meets the "Wild" classification criteria. These tentative classifications are based on conditions of the river corridor as they existed at the time of the study.

Management activities and authorized uses will not be allowed to adversely affect the eligibility or classification of this river. Management prescriptions for this river corridor should provide for protection in three ways:

- 1. The free-flowing characteristics of the river cannot be modified, to the extent that BLM is authorized under law to control stream impoundments and diversions.
- 2. Outstandingly remarkable values will be protected, and to the extent practicable, enhanced.
- 3. Management and development of the river corridor cannot be modified to the degree that eligibility or classification is changed.

A study report was prepared and included in the appendix to the proposed resource management plan/final environmental impact study and documents the application of the Eligibility/Classification/Suitability Criteria.

The study report was included as an integral part of the RMP process documentation. The determination within the RMP was a preliminary administrative recommendation for designation or non-designation depending on the suitability analysis. The recommendation will receive further review and possible modification by the Director of the BLM, the Secretary of the Interior and the President of the United States. Final decisions have been reserved by the U.S. Congress.
